

E'moni Mullins

Testimony

DC Council Hearing on School Security

April 21, 2021

I myself think it's important for police officers to be in school because everyone comes from different places and most kids grow up thinking fuck the police when in Reality they don't look at them like regular people or don't understand the difference i had a chance to actually grow and build bonds with the officers that worked at my schools and that's how most boys brung up in the street do, it really makes a difference bc most kids are raised with the mindset not to mess with police officers it's " FUCK 12 " I honestly hated the people at one point and didn't have a reason why but i talked my trash and cursed at certain officers and couldn't even tell you why i did it see them working in my school i grew a bond like family because even if I wasn't in trouble they still checked to make sure i was good or in class on task and if if I see any of the officer that worked in my school to this day I make it my business to speak because we family and they are absolutely great officers and if i never said thank you top officer Manley , Officer Tabor , officer diaz, officer jefferson, officer Jones some i knew since middle school and they transitioned to my high school at the same time i did so it was cool because they already knew my attitude
